Impression posts & model analogs

Article-No.	Article	Dimensions	Material	
N-005-020002	ICX Ø 3.3 Impression post closed	H 10.4mm Ø 4.5	Titanium	
N-005-030001	ICX Ø 3.3 Impression post open	H 8.5mm Ø 4.5	Titanium	
N-005-030002	ICX Ø 3.3 Impression post open, long	H 15mm Ø 4.5	Titanium	
N-006-010003	ICX Ø 3.3 Model analog standard BL CAD/CAM	Ø 4.0 L 10mm	Titanium	
N-006-010008	ICX Ø 3.3 Model analog TL CAD/CAM	Ø 4.0 L 10mm	Titanium	

Note: The screwing-in torque of 5 to 10Ncm should not be exceeded. Please screw in all ICX cover screws and healing caps only by hand. If you screw them in with 20 or more Ncm, there is a risk that conical forces will be created, which will make it almost impossible to loosen them later.

Note: H = Length from implant top edge - GH = Gingival height

Dear customers,

Please note the two different platforms of the BL and TL implants. Select the BL and TL laboratory analogs accordingly. This is important if the prosthetics later have to touch the different platforms of the implants due to the low emergence profile. different platforms of the implants (GH 0mm).

incl. prosthetic screw C-020-000011
(connection screw to ICX-MULTI abutment)

Field of application and indication

The ICX-MULTI® concept is a prosthetic concept for immediate restoration of edentulous patients. For better support of the provisional restoration, it is possible for the posterior implants to be placed at a 17° or 35° angle distally. This angulation is compensated by the special abutments.

Visit our ICX Shop.

Note:

medentis medical offers you instruction manuals on the following website: ifu.medentis.de

There you can find the manuals for use by entering the article number or retrieve the currently valid instructions for use of the product groups. The prerequisite is an Internet-capable end device at which PDF documents can be opened. If you would like to have the paper version of the instructions for use, please contact us and we will send it to you with UPS Express Saver free of charge by noon on the next working day. Alternatively, the user manual can also be faxed or sent by e-mail.

Article:

ICX-TL-Healing cap conical

- form an extended emergence profile for all subsequent restorations on abutments and adhesive bases, from GH 0mm
- protect the tulip platform during the healing process
- one-piece
- lie on the TL platform and grip around the 0.25mm circularly sloping tulip.
- the cone is at 4 degrees, Ø5,2mm

OVERVIEW:

CERICX healing cap & impression coping

For an emergence profile precisely matched to CERICX abutments and correspondingly formed and its subsequent impression. This makes it a complete system.

Article-No.		Dimensions	Material

C-005-030002		ICX titanium impression post, long, 2 pieces, Ø 4.5mm consisting of: Impression coping open, connection screw, impression aid	L 15.5mm	Titanium

Note: L = Length from implant top edge

OVERVIEW: ICX model analog

ICX modell analog

Article-No.		Article	Dimensions	Material
C-006-010001		ICX model analog for Bonelevel (BL) Implants standard	L 15mm	Titanium
C-006-010003		ICX model analog for Bonelevel (BL) Implants CAD/CAM	L 10mm	Titanium
C-006-010008		ICX model analog for TISSUE LEVEL (TL) Implants CAD/CAM	L 11.7mm	Titanium

Note: L = Length

Dear customers,

Please note the two different platforms of the BL and TL implants. Select the BL and TL laboratory analogs accordingly. This is important if the prosthetics later have to touch the different platforms of the implants due to the low emergence profile. different platforms of the implants (GH 0mm).

(connection screw for the ICX-MULTI abutment)

Field of application and indication

The ICX-MULTI® concept is a prosthetic concept for immediate restoration of edentulous patients. For better support of the subsequent restoration, it is possible for the posterior implants to be placed at a 17° or 35° angle distally. This angulation is compensated by the special abutments.

Article-No.	Article	Dimensions	Material

C-031-020003		ICX Maximus abutment, classic one-piece	GH 3mm	Titanium
C-031-020004		ICX Maximus abutment, classic one-piece	GH 4mm	Titanium

The one-piece & two-piece ICX Maximus abutments are a proprietary further development of medentis medical, compatible with the Locator™ abutments. Available for all ICX implants!

Note: GH = gingival height

C-015-100018		Triangular turning tool 25mm (short)	Stainless steel
C-015-100031		Triangular turning tool 30mm (long)	Stainless steel

OVERVIEW: ICX Maximus abutments, two-piece

ICX Maximus abutment, one-piece

Male with screw access channel & connection screw.

These anti-rotation superstructures are plugged and screwed.

Article-No.		Article	Dimensions	Material
C-031-010001		ICX Maximus abutment, with hex, two-part incl. connection screw	GH 1mm	Titanium
C-031-010002		ICX Maximus abutment, with hex, two-part incl. connection screw	GH 2mm	Titanium
C-031-010003		ICX Maximus abutment, with hex, two-part incl. connection screw	GH 3mm	Titanium
C-031-010004		ICX-Maximus-Aufbau, with hex, two-part incl. connection screw	GH 4mm	Titanium
C-031-010005		ICX Maximus abutment, with hex, two-part incl. connection screw	GH 5mm	Titanium

The one-piece & two-piece ICX Maximus abutments are a proprietary further development of medentis medical, compatible with the Locator™ abutments. Available for all ICX implants!

Note: It is inserted with 1.4mm hexagon insertion tool

ICX Maximus Accessories:

Article-No.		Article	Material
C-031-852400		Retention insert transparent Pull-off force approx. 2.3 kg, strong divergence compensation $\pm 10^\circ$	Plastic (pack of 4)
C-031-852700		Retention insert pink Trigger force approx. 1.6 kg, medium divergence compensation $\pm 10^\circ$	Plastic (pack of 4)
C-031-852900		Retention insert blue Pull-off force approx. 0.7 kg, weak divergence compensation $\pm 10^\circ$	Plastic (pack of 4)
C-031-854700		Retention insert green Pull-off force approx. 1.8 kg, medium divergence compensation ± 20	Plastic (pack of 4)
C-031-854800		Retention insert red Pull-off force approx. 0.4 kg, weak divergence compensation ± 20	Plastic (pack of 4)
C-031-851500		Processing male black, no retention (laboratory)	Plastic (pack of 4)
C-031-852300		ICX-Maximus Block out Spacer, pack of 2	Plastic (pack of 2)
C-031-851902		Processing package (titanium cap with black laboratory insert, spacer ring and retention inserts)	Titanium/ Kunststoff (2er Pack)
C-031-851910		Processing package (titanium cap with black laboratory insert, spacer ring and retention inserts)	Titanium/ Plastic (pack of 10)
C-015-100032		Core Tool (general purpose tool)	Stainless steel
C-031-850501		Impression cap	Titanium (pack of 4)
C-031-853000		Model analog Ø4mm	Titanium (pack of 4)
C-015-100018		Triangular turning tool 25mm (short)	Stainless steel
C-015-100031		Triangular turning tool 30mm (long)	Stainless steel

The one, & two-piece ICX Maximus abutments are a proprietary development of medentis medical, compatible with the Locator™ abutments. Available for all ICX implants!

Products marked with ® and ™ are registered trademarks of the respective manufacturer.

OVERVIEW: CM LOC® Matrices System

CM LOC® Matrices System

Article-No.		Article	Material
0500300		CM LOC® Basic Set Titanium 2-pack consisting of: 2 x CM LOC® housing for Pekkton® inserts 2 x CM LOC® retention insert, extra low 2 x CM LOC® retention insert, low 2 x CM LOC® retention insert, medium 2 x CM LOC® retention insert, high 2 x CM LOC® processing insert 2 x CM LOC® spacer	
07000205		CM LOC® Multi-Tool (mandatory required)	

FORCE LEVELS PEKKTON® RETENTION INSERTS

Dental restorations require a high degree of maximum planning flexibility, durability, comfort and system compatibility.

The CM LOC® matrix system is a maximum modular matrix system for universal applications. This means flexibility for the practitioner and comfort for the patient.

System advantages:

- + Simple practitioner- and patient-friendly application.
- + Easy replacement of the Pekkton® retention inserts.
- + Highly resistant to water absorption and taste deformation.
- + Optimized matrix design with Pekkton® retention inserts for high wear resistance.

The matrix design with retention inserts made of the high-performance polymer Pekkton® offers a good wear resistance, which enables restoration with ICX-MAXIMUS abutments.

The CM LOC® matrices are available with four easily exchangeable retention inserts in four defined force levels. The gingiva-colored matrix provides esthetic solutions.

**The CM LOC® matrix system
is compatible with the ICX-Maximus,
and LOCATOR® abutments!**
